What was your overall first impression of the website?

4 responses

clean and minimal, nothing unnecessary

It was easy to go through and understand.

Not sure if this question is about the portfolio or one of the websites. In any event, looks very professional and everything seemed to work as intended.

Excellent

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

4 responses

no

No

None. Lot of stuff here and I tried to hit as much as possible without any difficulty.

What do you feel are the most effective design elements of this web portfolio?

4 responses

easy to navigate

Simple easy to follow headings

Easy to read and understand the intentions. Good range of experiences shown.

hero component, 'favorite projects' feature, general theme

What would you suggest be changed with the design or content of this web portfolio?

4 responses

nada

Maybe more pictures

On the Democrat site, I didn't like the way the "News Posts" were displayed (L-R instead of top to bottom) requiring a page select instead of a continuous scroll (like Facebook).

horizontal scroll bar appears on all but case study page, likely just a little over 100% in sizing of the hero. Hero image is quite hefty at 1.1MB, consider compressing. Font for the portfolio slideshow doesn't match the rest of the site and feels disjointed
