Content of reflections appropriate	○	○	○	○	◉
Project images are high quality	○	○	○	○	◉
Spelling and grammar are correct	○	○	○	○	◉

What was your overall first impression of the website? *

Not sure if this question is about the portfolio or one of the websites. In any event, looks very professional and everything seemed to work as intended.

Did you have any technical difficulties as you navigated through the pages and displayed the projects? *

None. Lot of stuff here and I tried to hit as much as possible without any difficulty.

What do you feel are the most effective design elements of this web portfolio? *

Easy to read and understand the intentions. Good range of experiences shown.

What would you suggest be changed with the design or content of this web portfolio? *

On the Democrat site, I didn't like the way the "News Posts" were displayed (L-R instead of top to bottom) requiring a page select instead of a continuous scroll (like Facebook).

Project images are high quality	○	○	○	○	◉
Spelling and grammar are correct	○	○	○	○	◉

What was your overall first impression of the website? *

Excellent

Did you have any technical difficulties as you navigated through the pages and displayed the projects? *

no

What do you feel are the most effective design elements of this web portfolio? *

hero component, 'favorite projects' feature, general theme

What would you suggest be changed with the design or content of this web portfolio? *

horizontal scroll bar appears on all but case study page, likely just a little over 100% in sizing of the hero. Hero image is quite hefty at 1.1MB, consider compressing. Font for the portfolio slideshow doesn't match the rest of the site and feels disjointed
